Product Obsolescence Notification

To our valued customers,

At 10x Genomics, we are committed to enabling your research and providing you with the best experience to make scientific discoveries. As we release new technologies, we occasionally refine our on-market product offerings.

We will discontinue the sale and shipment of the following non-Next GEM products:

- **Effective June 30, 2020**, we will discontinue the sale and shipment of Chromium Single Cell ATAC v1
- **Effective December 31, 2020**, we will discontinue the sale and shipment of Chromium Single Cell Gene Expression v3

For the above-mentioned products, we will continue to offer our comparable Chromium Next GEM products. As you know, our Next GEM products were introduced in May 2019 and are now used by a majority of our customers. The Next GEM technology is our newest platform and future Single Cell products will be released only on this platform.

For detailed information on product codes and last shipment dates please see the attached sheet.

For additional questions, please contact your Sales Executive, Field Application Scientist, or email our Support Team at support@10xgenomics.com

We thank you for your continuing support and look forward to working with you in the future.
