## Free Coffee Chat at your institute - We bring the coffee, you bring the questions.

Curious how your lab could take its research to the next level? Register your institute for a free Coffee Chat and we'll bring a coffee cart to make it a relaxed, personalised session with 10x Genomics experts. Whether you're exploring single-cell genomics or spatial transcriptomics, we'll discuss how 10x Genomics solutions can make your projects faster, smarter, and more impactful. Share your goals, ask questions, and receive practical advice tailored to your research. Secure your session now by [completing the form](#) and take the first step toward advancing your lab's capabilities.

## 40% off Unchained Labs Lunatic UV/Vis Spectrophotometer

Make batch quantification of protein, DNA and RNA a no-brainer with the Lunatic.

Limited-time offer: 40% off Unchained Labs' Lunatic, the microvolume UV/Vis platform for fast, precise protein and nucleic acid quantification. Run samples without diluting - even at high concentrations. Use just 2 µL, run 96 samples in 10 minutes on an SBS plate, and get rock-solid data.

PROMO CODE UNC-EOFY2026

🕒 30 June 2026

## 10% off Agilent BioTek Microplate Washers, Dispensers, Readers & Combination Systems

Boost productivity with Agilent BioTek microplate washers, dispensers, readers and combination systems. From precise washing and dispensing to multimode detection, these instruments deliver speed, accuracy, and reliability. Ideal for ELISA, cell-based, and high-throughput assays, they streamline workflows and protect results. Save 10% now on proven and reliable performance.

PROMO CODE AGL-EOFY2026

🕒 30 June 2026

## 15% off all LICORbio Reagents

LICORbio reagents are known for their reliability and accuracy in molecular and protein analysis applications such as Western Blotting. With a strong reputation for quality and consistency, these reagents deliver robust results that researchers can trust. Popular LICORbio reagents include: Intercept (PBS) Blocking Buffer, Revert 700 Total Protein Stain Solution and IRDye 800CW Goat anti-Mouse IgG (H+L).

PROMO CODE LCR-EOFY2026

🕒 30 June 2026

## Trade in/up your flow cytometer and receive up to 30% discount on the NovoCyte.

Is your current cytometer limiting sensitivity, flexibility or throughput? Now is the perfect time to upgrade.

Agilent NovoCyte flow cytometers combine high-performance optics with intuitive software and flexible configurations - giving your lab the confidence to push boundaries without complexity.

**PROMO CODE** NOVO-EOFY2026

 30 June 2026

## Upgrade your existing Agilent Cytation imaging system and receive 20% off additional fluorescence filter cubes.

Expand the capabilities of your Agilent Cytation imaging reader with additional fluorescence filter cubes.

Whether adding new fluorophores, supporting multiplex assays, or enabling new applications, now is the perfect time to upgrade.

**PROMO CODE** CYT-EOFY2026

 30 June 2026

## Trade in your live-cell analysis platform and receive up to 30% off the Agilent xCELLigence RTCA instrument.

Using real-time impedance-based technology, xCELLigence enables label-free monitoring of cell proliferation, migration, invasion and cytotoxicity without complex workflows or endpoint assays.

Trade in your existing system and access the next generation of real-time, label-free cellular analysis with up to 30% off a new xCELLigence system.

**PROMO CODE** XCELL-EOFY2026

 30 June 2026

## Trade in your non-Mabtech ELISpot or FluoroSpot reader and receive up to 35% off when purchasing a Mabtech instrument.

The most reliable and user-friendly ELISpot and FluoroSpot reader. Experience flawless ELISpot and FluoroSpot analysis with Mabtech IRIS 2. Mabtech's straightforward design eliminates the need for extensive training and subjective data interpretation. Get precise results effortlessly in a matter of minutes.

**PROMO CODE** IRIS2-EOFY2026

 30 June 2026

## 20% off Mabtech EYRA and get 1 FREE EYRAPlex kit.

The Mabtech EYRA delivers fast, fluidics-free multiplex detection using confocal imaging - no calibration, no clogging, no maintenance. With the built-in RAWsphere algorithm and Opal™ software, results for up to 30 analytes are ready in  $\approx$ 15 minutes, boosting lab productivity.

**PROMO CODE** EYRA-EOFY2026

 30 June 2026

## 25% off Meridian Life Science Direct qPCR and RT-qPCR Mixes

Meridian's Direct qPCR and RT-qPCR mixes enable amplification straight from crude samples such as blood, stool, or urine with no extraction required. Highly inhibitor-tolerant formulations deliver reliable, ultra-sensitive detection. Choose from universal or sample-specific mixes, available in Air-Dryable, or Lyo-Ready formats for ambient temperature stability and extended shelf-life.

**PROMO CODE** QPCR-EOFY2026

 30 June 2026

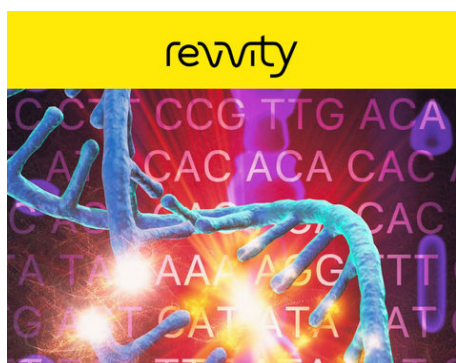

## 25% off Meridian Life Science End-Point Polymerase

Meridian Life Science (formerly Bioline) is your solution for reliable, specific results. Their end-point polymerase portfolio includes Taq polymerases with optimised buffers for fast cycling and robust performance, plus high-fidelity options ideal for cloning and NGS library amplification. Enzymes are also available in glycerol-free, lyophilisation-compatible formats for room-temperature stable assay development.

**PROMO CODE** PCR-EOFY2026

 30 June 2026

## 30% off PinPoint and Edit-R CRISPR gene editing reagents

Dharmacon's Edit-R CRISPR gene editing system offers optimised tools for high-confidence genome engineering, while Pin-point base editing enables single-nucleotide changes without DNA breaks for drug discover and development.

**PROMO CODE** CRISPR-EOFY2026

 30 June 2026

## Save 30% on the new ON-TARGETplus 2.0 SMARTpool siRNAs and get a free ON-TARGETplus 2.0 Non-Targeting Pool

**PROMO CODE** ONTARGET-EOFY2026

 30 June 2026

## 15% off Norgen RNA extraction kits

Capture total RNA from large mRNA to microRNA without GC or size bias. Get higher yields compared to standard silica columns, with no phenol required. Choose from a comprehensive range of sample specific kits for challenging samples including FFPE, animal tissue, soil, and blood.

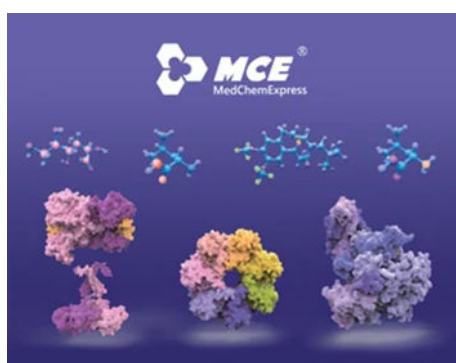

**PROMO CODE** EXTRACT-EOFY2026

 30 June 2026

## Bonus offer! Save 30% on all Norgen exosome extraction kits

**PROMO CODE** NOREXO-EOFY2026

 30 June 2026

## Save up to 25% off on essential research products from MedChemExpress.

MedChemExpress offers cost effective compounds, innovative reagents and drug discovery tools that accelerate your research without compromising on quality.

- 25% off ready-to-use compound screening libraries
- 20% off antibodies, proteins, isotope-labelled compounds, fluorescent dyes, siRNA & miRNA, MCE kits
- 10% off bulk size products, custom synthesis services

**PROMO CODE** MCE-EOFY2026

 30 June 2026

**SB Sino Biological**  
Recombinant Proteins and Antibodies for Life Science Research

Cytokines and Growth Factors    Antibody Therapeutic Agents    CAR-T Cell Therapy Targets

## Buy 2 Sino Biological antibodies or proteins and receive a third one for free.

Sino Biological's high quality recombinant proteins and antibodies are perfect for advancing your research. This offer lets you maximise value without compromising performance. Whether you're targeting signalling pathways, cytokine activity, or viral antigens, now's the ideal moment to stock up and save on essential lab tools

**PROMO CODE** SINO-EOFY2026

30 June 2026

**Hycult Biotech**  
Let's improve health

**Tools for complement research**

## 30% off selected Hycult Biotech Complement Assays

Hycult Biotech's high-quality, validated complement ELISA kits and assays for TCC, C3, Complement factor H, and the Classical and Alternative Pathways are designed to perform reliably across species to provide accurate quantification of complement activation and inhibition for autoimmune and inflammatory disease drug discovery and development.

**PROMO CODE** HYCULT-EOFY2026

30 June 2026

**CUSABIO**

ELISA KIT

## 25% off all Cusabio ELISA kits

Designed for precise and reliable detection, Cusabio ELISA kits cover a broad spectrum of proteins and biomarkers, supporting a wide variety of sample types. Trusted by laboratories worldwide, these assays are engineered for consistent performance and reproducibility, helping you generate data with confidence. Ideal for investigating cellular pathways, cytokine profiles, or disease biomarkers.

**PROMO CODE** CUSABIO-EOFY2026

30 June 2026

**RayBiotech**  
Empowering your proteomics

## 25% off RayBiotech ELISA kits

RayBiotech ELISA kits have been tested by thousands of researchers, with experiments published in high impact journals including Cell, Nature, and Science. Discover why researchers worldwide trust RayBiotech for reproducible data.

- Over 7000 targets
- Broad range of samples
- Wide selection of species
- Unmatched quality and reliability

**PROMO CODE** RAYBIO-EOFY2026

30 June 2026

**InvivoGen**

## 10% off all InvivoGen MycoStrip Detection Kits, Antimicrobial Agents & Selective Antibiotics

Contaminated cell cultures can lead to unreliable results, lost time, and wasted resources. Routine testing is essential to maintain healthy and reliable cells. InvivoGen offers easy-to-use mycoplasma testing kits, along with selective antibiotics and antimicrobial agents designed to detect, eliminate, and prevent contamination.

**PROMO CODE** INV-EOFY2026

30 June 2026
